

TAPS

minimax

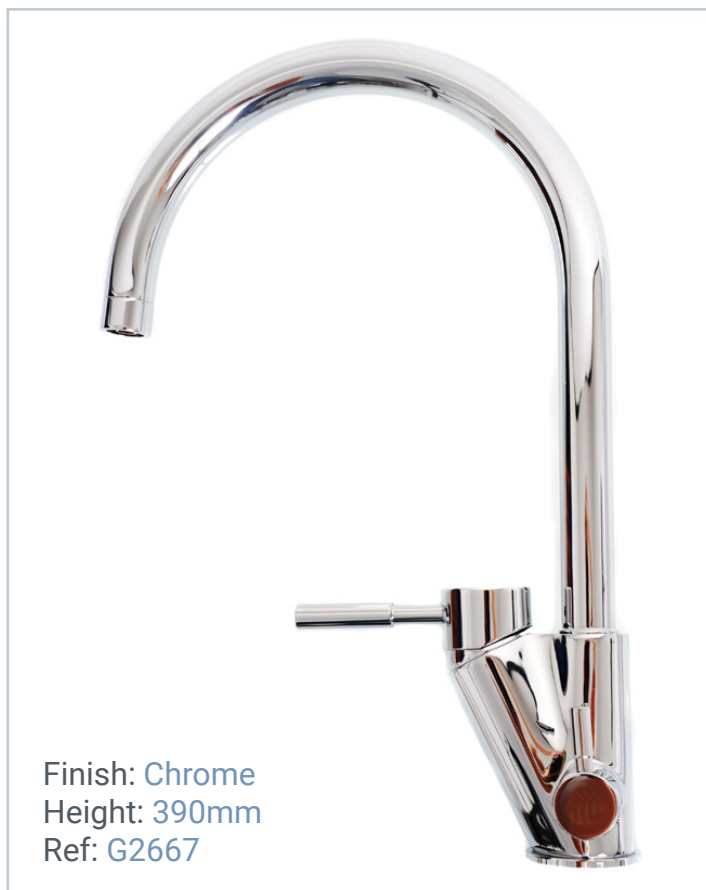

There are many choices of drinking taps available

We have a great selection of 3-way taps and faucet taps if you decide to have a drinking water line with your Minimax Water Softener. Either as a brand new valve, or an addition to your current tap you can choose one based on your style, colour and design preferences; we have lots of options available.

Your local Minimax dealer will be able to help advise you on the best tap for your needs. If you find something you like here, simply quote the reference code of the tap to your local dealer and they can provide you with more information.
